Country Rankings

English Fluency

English is widely spoken across South Africa, the most English-proficient country on the continent (ranking 12 of 111 countries globally).

Economic Stability

Despite boasting one of the largest, industrialized African economies, South Africa is still recovering from COVID-19 with continued slow growth expected in 2023.

Tariffs and regulations

South African officials recognize the need to attract foreign investors and are actively implementing reforms open to FDI to drive growth and competition.
